

Happy teachers make happy students

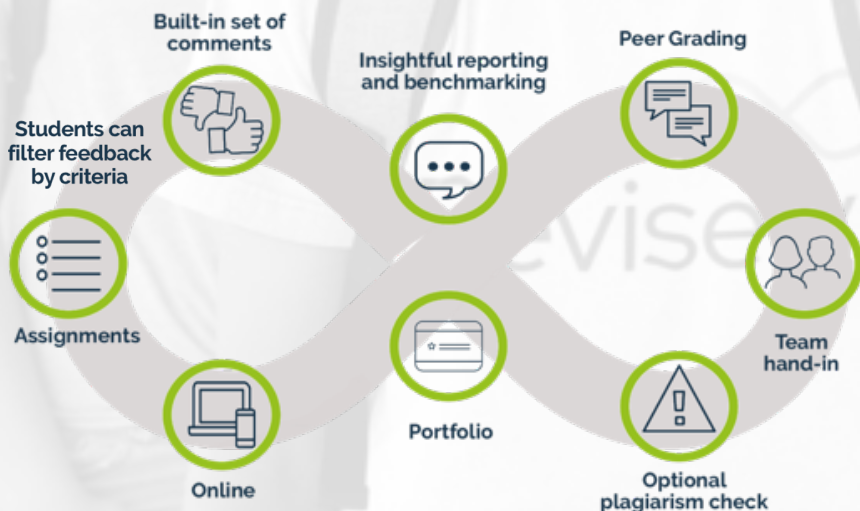

Revisely

What is Revisely?

Thanks to Revisely's tool teachers can grade and give more insightful feedback on students' work in less time.

The unique and extendible comment sets that are integrated in Revisely's web app can be about how to improve writing skills but can also include teachers' feedback on the content. Offering all this extra in-depth feedback increases students' engagement and learning outcomes.

In addition to facilitating one-on-one grading by teachers in an interactive format, Revisely also offers various other features such as plagiarism checking to promote original writing, Team Hand-ins to stimulate working in groups and Peer Grading & Feedback to help students learn from each other.

Save time and give more insightful feedback on your students' work

- ✓ Works for documents for any subject in any language
- ✓ Built-in plagiarism-checker by Urkund and others
- ✓ For HE and K12
- ✓ Grade anywhere, anytime, in any browser and on any device
- ✓ Can be integrated in other educational applications through LTI 1.1 and 1.3
- ✓ Propriety integrations with our assignment API, including status updates and notifications
- ✓ Revisely is integrated within Microsoft Teams, Moodle, Somtoday, Magister en Magister.me
